

A list of theoretical questions for independent work of higher education students

1. The history of the development of homeopathy.
2. Basic terms of homeopathy.
3. Basic principles of homeopathy.
4. State regulation of the production of homeopathic medicines.
5. Modern aspects of the development of homeopathic therapy in Ukraine and in the world.
6. Homeopathic recipes and abbreviations used.
7. Modern nomenclature of homeopathic medicines.
8. Preparation for a practical lesson using information and communication technologies.
9. Classification of homeopathic medicines by sources of raw materials, method of application, principle of dosing.
10. Matrix tinctures.
11. Basic drugs.
12. Extractants for the production of basic drugs.
13. Glycerin macerates.
14. Technology for the manufacture of basic drugs according to the Schwabe manual.
15. Assessment of the quality of basic homeopathic remedies and their design for use.
16. Dilution scales and dosage features.
17. The principle of dynamization of homeopathic medicines.
18. The method of potentiation of matrix homeopathic tinctures according to the guidance of V. Schwabe.
19. Liquid basic preparations from mineral substances.
20. Liquid dilutions from matrix tinctures.
21. Excipients in the technology of liquid medicines.
22. Manufacturing technology of rare dilutions according to the guidance of V. Shvabe.
23. Hering's law of healing.
24. Oil in homeopathic practice. Definition. Characteristic.
25. Excipients in the technology of homeopathic oils.
26. Technology for the manufacture of homeopathic oils according to the guidance of V. Schwabe.
27. The constitutional type of the patient.
28. Granules in homeopathic practice.

29. Methods for preparing homeopathic granules from matrix tinctures, their dilutions.
30. Excipients in homeopathic granule technology.
31. Technology for the manufacture of homeopathic granules according to the guidance of V. Schwabe.
32. Modality and miasms in homeopathy.
33. Homeopathic triturations. Definition. Characteristic.
34. Excipients in homeopathic triturations technology.
35. The methods of preparation of triturations are homeopathic.
36. Excipients in the technology of hard drugs.
37. Manufacturing technology of homeopathic triturations according to the guidance of V. Schwabe.
38. Complex homeopathy.
39. Liquid and hard complex homeopathic medicines. Registration for the release of complex homeopathic preparations.
40. Methods for the production of complex homeopathic medicines.
